

Dantech Group

Exclusive Wencon distributor in the USA

Experts in Corrosion control

Surface restoration

surface protection

In-situ repairs

Wencon Epoxy products since 1985. the products contain no metallic fillers or solvents, making our products unique and extremely versatile.

- ✓ Great adhesion to **all Steel, Metal and GRE**
- ✓ Not electrically conductive
- ✓ Eliminating bi-metallic corrosion
- ✓ Narrow product range / thousands of applications
- ✓ All non-dangerous goods (transport by Air, Sea, Road and Rail)
- ✓ High specific volume per kilogram

WENCON®

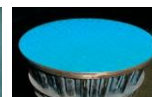

GRE pipe repair solutions, Wencon offer a range of products that are specially formulated to repair and restore the integrity and functionality of GRE pipes. These innovative solutions are easy to apply and provide fast and cost-effective repairs without the need for costly replacements or major downtime.

Let's take a closer look at some of the key features and benefits of Wencon GRE pipe repair solutions:

- **High-quality materials:** The products are made from premium-quality epoxy resins and reinforcement materials that are carefully selected to ensure superior performance and durability. These materials are engineered to withstand extreme conditions, such as high temperatures, chemicals, and pressure, making them ideal for repairing GRE pipes in challenging environments.
- **Versatile application:** Wencon GRE pipe repair solutions can be used for a wide range of applications, including onshore and offshore pipelines, process piping, storage tanks, and marine structures. And they are compatible with different types of GRE pipes, such as pipe spools, elbows, tees, flanges, and reducers, making them suitable for repairing various pipe configurations and sizes.
- **Easy and quick application:** Simple application techniques allowing for fast and efficient repairs. The products come with detailed instructions and can be applied using simple hand tools, minimizing the need for specialized equipment or skilled labor. This ensures that repairs can be carried out swiftly, reducing downtime and minimizing production losses.
- **Long-lasting repairs:** Wencon GRE pipe repair solutions provide durable and long-lasting repairs that can extend the service life of GRE pipes. When cured, the repaired pipes exhibit excellent resistance to chemicals, abrasion, and corrosion, ensuring reliable performance even in harsh environments. This help reduce the frequency of repairs and replacements, saving costs and resources in the long run.
- **Cost-effective:** Wencon GRE pipe repair solutions is a cost-effective alternative to traditional pipe repair methods, such as pipe replacement or hot work. The products are competitively priced and require minimal labor, equipment, and downtime, resulting in significant cost savings for industries that rely on GRE pipes for their operations.
- **More sustainable products:** Wencon GRE pipe repair solutions are “more sustainable” than most traditional solutions. The products are solvent-free, low VOC (Volatile Organic Compounds), and do not emit harmful fumes during application. They are also resistant to chemicals, reducing the risk of environmental contamination and ensuring long-term sustainability.

UNIQUE AND EXTREMELY VERSATILE - EACH PRODUCT IS A “SOLUTION”
